Re: Starting Budget Recommendation — Website Compliance Remediation

Dear Members of the Board,

I'd like to give the Board a solid starting point for the website compliance work discussed with the Town Supervisor.

I recommend a starting budget of **\$1,500–\$2,000** to begin this work.

With that budget range, I can make good progress on the site. Whether the compliance updates are fully completed within that budget or there is still work remaining, we can pause at that point to reassess what has been done and what is left to do before committing further funds.

As with any compliance and remediation project of this kind, it's difficult to fully predict the total scope of work in advance. That said, I'm hopeful that within this recommended starting budget we can get the majority of the work done, if not all of it.

Please let me know if you have any questions or concerns on anything. Thank you for your time and consideration.

Respectfully,

Frank Davi

Web Developer & Technology Support Specialist
